

## mySAP PLM

*„The SAP Work Clearance Management component, developed by SAP with the collaboration of Iberdrola, has contributed to the increase in safety and efficiency of work in all of Iberdrola's power plants, being specially useful for refueling Cofrentes Nuclear Power Plants.“*

Juan Antonio Almendros Monedero, IT

## WORKING SAFELY IN POWER PLANTS USING WORK CLEARANCE MANAGEMENT

SAP Success Story

## A BETTER SOLUTION FOR MANAGING AND EMPOWERING SAFETY IN POWER PLANTS

Iberdrola is one of Europe's leading electricity companies, with almost 8.8 million customers in Spain and over 7 million in Latin America. Iberdrola also has a large Industrial Group operating in several sectors and countries. It employs 10,800 people and had sales of €7,000 million in 2000.

Iberdrola Generación's total installed capacity for hydroelectric, conventional thermal and nuclear production is 16,000 MW. Gross production totals 51,200 GWh and accounts for 29 % of Spain's total production.

Iberdrola S.A., Spain
